HDD Formatting Guide

- You may format your external HDD through USB 2.0 connection.
- Please make sure your external HDD is turned on and well connected to the PC before formatting the HDD.

1. Right-click “My Computer” icon and select the ”Manage” column.

2. Select “Disk Management” and you will see your External HDD showed “Unallocated”.
3. Right-click on the “Unallocated” block and select “New Partition”.

4. The “New Partition Wizard” will appear. Please follow the instruction of the wizard to complete.
5. When new partition is completed, the external HDD will be recognized as a “New Volume”.

![Diagram showing new partitioned HDD]

Welcome to the New Partition Wizard

This wizard helps you create a partition on a basic disk.

A basic disk is a physical disk that contains primary partitions, extended partitions, and logical drives. You can use any version of Windows or MS-DOS to gain access to partitions on basic disks.

To continue, click Next.
6. Double-click “My Computer”. You will see the new volume appears on your PC.

How To Backup Files with PCClone

First connect a hard drive to the KWI-S2 device. Refer to the manual included on how to connect your hard drive.

1. Install PCClone EX with the CD included.

2. Open PCClone.
3. Select the folders and files you would like to back up.

4. Now press the “OTB” button twice or click on the backup icon to start the backup process.
5. Once the backup process has finished your files will be safely stored on the hard drive connected.

Please note that the files are saved on the hard drive in a folder named Fnet. This folder is hidden and to see it you must change your folder options to show hidden files.

**How to Restore Your Files with PCClone**

Select the Folders and files you want to be restored.
1. Click on the restore icon and then click ok.

2. Once the restore has finished your files will be copied to its original location.
